

EES4404 Project presentation

Each group will be assigned a technical paper.

The group will have to study the paper. May refer to additional resources (web sites, technical papers or books) on their own to understand the background of the topic so that they can explain during presentation. Students should explain the technical content of the paper. They should also share the latest developments in the topic.

All students should be able to clearly show their own contributions to the project.

Students from all six groups must be present during your assigned two-hour time slot.

Each group is expected to finish their presentation between 15 to 20 min, including Q&A.
